Women's Union Agrees To Pay Greater Share of Student Costs

The Women's Union Executive yesterday moved that it is prepared to pay a greater share in the upkeep of the present students' Union.

This decision was reached after a consideration of the factors involved and it was felt that the main concern of the Women's Union should be the maintenance of the present Union Building.

The chief reason for paying equally has been cited by various members of the students' society as equality of opportunity for men and women in the Union.

NOT TO BE EQUAL

However, since at least two men are receiving room and board because of their positions, which are not open to women students, and since Royal Victoria College maintains facilities duplicated by the Union, the executive felt that the proportion of fees assigned should not be the same.

The executive further stated that a different agreement would have to be reached for a new Student Centre. In the mean time, they will continue to take positive action and present definite financial proposals at a later date.

FEE BREAKDOWN

At present male students pay \$14 to the Students' Society, of which \$9 goes to the SEC, \$3.50 to the Students Union and \$1.50 to the Daily. Female students pay \$10.50 to the Students' Society of which \$9 is allotted to the SEC and \$1.50 to the Daily. The remaining \$3.50 goes to the Women's Union who keep \$2.50 and give \$1 to the Students' Union.

A student explores the new Radar Antenna situated on the ninth floor of the McConnell Engineering Building.

As candidates campaigned up to the very last moment, and scrutineers swarmed around polling booths, students managed to work up enough interest to cast 41% of the eligible votes in yesterday's campus-wide elections.

This was a decrease from last year's 42.4%. Only two positions were acclaimed as compared to six acclamations last year.

SEC RESULTS

With 33% of the Arts and Science students voting, Irwin Cotler and Gordon Echenberg were chosen to represent their faculty on the Students' Executive Council. In the School of Commerce, 50% of the faculty voted resulting in the election of Marion MacDougall. In the faculty of Engineering, Sol Polatshek and Jack Utsal scraped a majority out of the 23% turnout demonstrated by the Engineers. 57% of the eligible law students cast their votes, and chose Murray Greenwood as their representative to the SEC. Irwin Kornbluth was chosen to represent the faculty of Medicine as 26% turnout was registered. The school of Architecture showed the keenest interest, as 58% of its members voted. The final returns registered a tie between Moshe Salfie and John Duvernet. As we go to press, no report has been received on how this deadlock will be decided.

ACCLAMATIONS

Ray Simser was acclaimed in the schools of Physical Education, Physiotherapy and Graduate Nurses. The faculty of Dentistry unanimously chose Charles Oyer to represent them on the SEC.

WOMEN'S UNION

The new vice-president of the Women's Union is Heather Attridge. Elected to support the executive were Joan Bradshaw and Judy Lamb, as non-resident members-at-large. The resident member-at-large is Peggy MacLean. The W.A.A. representative for the coming year will be Bertha Kallion.

Nine girls were elected to the Red Wing Society: Janet Ander-

son from Physiotherapy, Jean Bradshaw, Peggy MacLean, and Ann Wilson were chosen from second year Arts and Science; and Heather Attridge, Molly Cooper, Vita Land, Judy MacLean, and Jean McMichael were elected from third year Arts and Science.

SCARLET KEY SOCIETY

Arts and science: Group 'A'. Marvin Wexler, Cameron Grout, Barry Margulis, and Irwin Cotler; Group 'B'. Joel Bell and Stanley Messer. Commerce: Group 'B'. Jim Hughes and Mike Alexander. Engineering: Group 'B'. Colin Russell and John Everitts. Dentistry: Group 'A'. William Holmes. Architecture: Group 'A'. Jacques Derome.

P.C.s Oust Liberals in Close Race

There was a major upset in yesterday's voting for the Model Parliament when the Progressive Conservative Party ousted the Liberals from a supremacy of two years.

The P.C.s obtained twenty-two seats as opposed to 17 for the Liberals, 10 for the Neo-Radical party, 6 for the C.C.F. party, and one for the independent Denis Coupland. The Radical Jewish party received two votes.

The Model Parliament will take place next Wednesday, December 2 at 7:30 pm in Moyse Hall. The speaker of the House will be Prof. J.R. Mallory, Chairman of the Department of Economics and Political Science. All students are welcome to this political event.

Revue Signs Ex-Fur Lady Director

"Devil May Care", this year's Red and White Revue, will be directed and choreo-

graphed by Brian Macdonald. His last appearance on the McGill scene was performing

the same duties for "My Fur Lady", the million-dollar musical of 1957.

The long-awaited announcement was made at a Revue press conference last night. "It's a great break for the Revue," shouted Producer Ian Binnie, above the clamour, "he is known and respected from coast to coast as the best man in his field, an amiable genius, that's what he is."

Exclaimed ex-Fur Ladyite Judy Tarlo, "It's a terrific opportunity for anybody to really learn about the theatre, he's just wonderful. It's great fun just working with him."

VANIER AS PATRON

It was also announced at last night's press conference that Governor-General George P. Vanier has extended his official patronage to the show, which opens in Moyse Hall February 4th. Allan Shiach and Ian Easterbrook have been named Assistant-Producers of "Devil May Care".

Macdonald arrives in town Monday afternoon to begin auditions.

DIRECTOR FROM MCGILL

The new Director, a McGill graduate, has participated in several Previous Revues, both as a student and a professional. He founded his own company, The Montreal Theatre Ballet, and has directed and choreographed a wide variety of operettas, musicals, night club routines and television shows. He has just com-

pleted choreographing several numbers for the Royal Winnipeg Ballet.

AUDITIONS

Auditions for "Devil May Care" begin 8pm Monday evening for dancers and those singers and actors who can "hoofe a bit". On Tuesday the schedule is as follows: 10-12 noon, actors and singers; 2-4 pm, dancers, 7pm, actors and singers. All those wishing to perform should audition at the first time stated for their specialty, and, requests the Director, "please be on time."

BRIAN MACDONALD
revue director

Parliamentarians Defeat Top McGill Debaters

by BRUCE STOVEL

Two McGill debaters were defeated by a pair of Parliamentarians last night in the Debating Union's third public exhibition at Redpath Hall.

The Hon. George Nowlan, Minister of National Revenue and Mr. W. Heward Graffley, representative in the House of Commons for the Brome-Missisquoi riding, successfully advanced the topic: "Resolved that this house approves of the two party system for Canada". Roy Heenan, a third-year law student, and Claude Armande Sheppard, a recent graduate of McGill's law school, opposed this resolution.

WINNERS VOTED

The audience voted to choose the winners at the end of the debate. Bryce Weir, Chairman of the debate and President of the McGill Students' Society, announced this at the start of the evening and

then went on to introduce each of the speakers in turn.

The Hon. George Nowlan spoke first for the Affirmative side. He stated that there was no need to dispute the existence of the party system; He believes that the machinery of government demands this for a one party system contradicts the basic ideal of liberty.

DEFINES SYSTEM

Then he defined the two party system as one which provides one party with a clear majority in the House of Commons. He pointed out that the faults of a multi-party system were factions continually warring and a lack of decisiveness. The two party system "had stood the test of time," he declared, and had given stability, responsibility and continuity.

Heenan, the first speaker for the Negative, stated the three practical ills, as he saw them, in the two party system. There is, he said, no difference between the two parties and "everything triumphs but ideas". Next, he emphasized the

fact that the third parties are the groups that produce original ideas. Third, he said that the two parties have only material objectives and try to "out-bribe" the voters.

Mr. Graffley, speaking for the Affirmative, stressed the fact that the multiple party system causes coalitions and minority governments. Also, he added that "since 1867, only two parties have presented a truly national policy".

SHEPPARD CONCLUDES

Claude-Armand Sheppard countered by stating that the multi-party system had worked in other democracies, such as Switzerland. He continued to state that the argument of efficiency used by the Affirmative was merely a disguised appeal to self-interest and expediency. Thus he concluded: "supporting the resolution will mean the victory of expediency over intellectual integrity".

The audience then voted the affirmative side as victors.

COMING

Today

CHRISTIAN SCIENCE ORGANIZATION MEETS

There will be a Regular Testimony Meeting. Everyone welcome. Rm 210, Arts Building, 1 pm.

FOLK MUSIC SOCIETY PRESENTS LOCAL SINGER

The meeting will feature Jim Murray, prominent local folksinger. Walter M. Stewart Room, 7:30 pm.

P.C. CLUB HOLDS SELECTION BOARD

Important general meeting for selection of M.P.'s for the McGill Model Parliament. Club Room, 1 pm.

POSTER PRESS ANNOUNCES PLANS

No more orders will be accepted after 5:00 pm today until after the Christmas exams.

FILM SOCIETY SHOWS FILM

The film 'My Darling Clementine' will be shown. Tickets will be available at the door, 6:15 and 8:30, PSCA.

M.P.E.E.U.S. TO HEAR ADDRESS

Mr. Brian Cleary, of the Physical Education staff of Selwyn House, will address the M.P.E.E.U.S. 2 pm in the lecture room of the Currie Gym.

STUDENT ZIONIST ORGANIZATION MEETS

Dr. Dari, Zionist Revisionist and Mr. Y. Harari, Jewish Agency in N.Y., will speak on "Is Israel too Socialistic?" Walter M. Stewart Room, 1 pm.

GENERAL MEETING PSYCHOLOGY CLUB

Films will be shown during meeting. Bring your lunch. Rm 250, Biology Building, 1 pm.

SCM SHOOT THE BULL AGAIN

A bull session on the Marxist idea of history and the Great Man idea of history will be held. Refreshments. SCM House, 3825 Oxenden Ave.

Henceforth

SPORTS TEAMS TO TAKE ANNUAL PHOTOS

The following teams will have their pictures taken Thursday, Dec. 3. At 6 pm., Rugby; 6:10, Track & Field Harrier, and Golf; 6:30, Cheerleaders and Band. On

Tuesday Dec. 8, 6 pm., Senior Football.

CAMERA CLUB TO SHOW ANSCO SLIDES

The Camera Club will show Anso slides of "Better Travel Slides with Ansochrome", to be followed by showing of members' slides.

CHRISTIAN FELLOWSHIP SCHEDULE OF EVENTS

A bowling party will be held on Thursday, Dec. 3, at 7:45 pm. All interested should meet at the Student House, 3445 Peel St. Refreshments will be served.

The Bible Study Group will meet on Dec. 8 from 1-2 pm. in Rm 145 of the Arts Building.

Dr. Brian Telford will conclude his series of addresses on "What We Believe" on Thursday, Dec. 11 at 7:45 pm at the Student House.

C.C.F. CLUB TO SPONSOR GUEST SPEAKER

A prominent member of the national C.C.F. Party will discuss the new policy of the Party at a meeting to be held in mid-December. Watch bulletin boards for further details.

COSMOPOLITAN CLUB TO SPONSOR CHRISTMAS PARTY

The Cosmopolitan Club will sponsor an International Christmas Party in the form of a dance on Saturday, Dec. 12 at 8:30 pm. in the Union Ballroom.

BRIDGE CLUB TO HOLD TOURNAMENT

Duplicate bridge tournaments will be held on Tuesday Dec. 1 and Dec. 8 at 7 pm. in the Union Cafeteria.

BIOLOGICAL SOCIETY TO SHOW FILMS

In honour of the Centenary of the publication of the "Origin of Species" by Darwin and the Bicentennial Anniversary of the "Systema Naturae" by Linnaeus, the two films "Darwin and the Insect Adaptations in Brazil" and "Carl Linnaeus" will be shown by the Biological Society in Rm 250, Biological Building, at 5:15 pm, November 30, Monday.

PROFESSORS TO ADDRESS MATHEMATICS SOCIETY

Prof. H.S.M. Coxeter of the University of Toronto will speak on "Sylvester's Problem of Colinear Points" on Wednesday, Dec. 2 in Rm 106 of the PSC. at 1 pm. Prof. H. Schwerdtfeger will speak on the "Isoperimetric Problem" in Rm 106 of the PSC. at 1 pm on Wednesday, Dec. 9.

NATIONAL CLUB PRESIDENTS TO MEET

A meeting of all National Club Presidents will take place on Tuesday, Dec. 1 from 1-2 pm. in the Board Room.

PRE-MED SOCIETY TO SPONSOR LECTURE AND FILM

Dr. D. Rubenstein, from the dept. of Biochemistry, will address the Pre-med Society on "Biochemistry of Diabetes Mellitus", on Wednesday, Dec. 2, in Rm. 250 of the Biology Bldg. at 1 pm. All welcome.

A film, "Medical Effects of the Atomic Bomb" will be shown on Wednesday, Dec. 9, in Rm 250 of the Biology Bldg. at - pm.

DR. McARTHUR TO ADDRESS PROTESTANT GROUPS

Dr. M. McArthur, a Christian Medical doctor who is an expert on Moslem Affairs, will present "Chal-

lenge of Christian Medical Work in North Africa". The first lecture will be held on Tuesday, Dec. 1, from 1-2 pm in Rm 145 of the Arts Building.

The second meeting will be held on Thursday, Dec. 3 from 1-2 pm, in Lecture Room "A", Medical Building.

Engineering and Science Graduates ... Have you thought of a career in Steel?

The spectacular growth of Stelco over the last ten years or so — and the certainty of its accelerated growth in the coming years — has created many fine opportunities for the university graduate.

ENGINEERING and SCIENCE

Modern steelmaking at Stelco requires engineers and scientists of all kinds ... metallurgists; chemists; chemical engineers; electrical engineers; mechanical, industrial, and civil engineers ... for a wide range of activities in planning, development and production.

For information on the advantages and prospects of a career with Canada's foremost producer of steel and steel mill products, consult your Placement Officer or write to:

Silent Seniors Speak In Debating Series

The McGill Debating Union has announced the inception of a new set of tournaments, to be known as the "On Campus" Series. Its purpose is to give senior debaters, who would otherwise be inactive in the debating world, a chance to "keep in shape". The debates are to be held every Thursday and will include a wide range of topics.

Dr. Rubenstein Will Lecture To Pre-Med Society

Dr. D. Rubenstein of the Department of Biochemistry will address the Pre-Medical Society on Wednesday, December 2 at 1 pm in room 250 of the Biology Building. The topic of this lecture will be "Biochemistry of Diabetes Mellitus".

Having received his B.Sc., M.D., and Ph.D. in Biochemistry at McGill University, Dr. Rubenstein is now Assistant Professor of Experimental Medicine as well as Assistant Professor of Biochemistry. Although he is presently engaged doing research on the toxicity of carbon tetrachloride in the body, he has in the past given several lectures on Diabetes.

One week later in the same room at 1 pm, the Pre-Med Society will show the film, "Medical Effects of the Atomic Bomb". All interested students are invited to attend those two informative programs.

The series gets under way on Thursday, December 10 at 1 p.m. in the Union Basement Workshop. The topic to be torn apart has to do with an irrevocable incident: "Resolved that Plymouth should have landed on the Pilgrim Fathers." Whether one's sympathies are with the Rock or the Fathers, he will enjoy this give-and-take of opinion.

The Debating Union has also announced that the winner of the Bovey Shield for public speaking will be chosen on Monday in the Walter M. Stewart Room of the Union, from 1 to 2 p.m. The holder of the shield will be chosen from among the four finalists — Sylvia Bank, Jerry Cohen, Jack Brandes and Moishe Znaimer.

S. A. M. To Visit Tobacco Company This Afternoon

The Society for the Advancement of Management has planned a tour of the Imperial Tobacco Company to be held Wednesday, December 2, beginning at 1:45 from Roddick Gates. The two hour trip will include a visit through the plant, refreshments, and talks with the top executives of Imperial Tobacco.

On December 9, 1 pm, S.A.M. is holding a meeting in the Walter M. Stewart Room of the Union, when they will feature Mr. Stan Bogusheski, General Manager of the Sunlite Food Products Inc. His topic is "Outlook of the Undergraduate in Industry".

Othello to be Shown Next Weekend; Students to See Russian Version

Twelve hundred English 100 students will have the opportunity to see a film of the Shakespearean tragedy "Othello", which is on their course of studies.

Through the co-operation of the McGill Film Society, the Russian version of the film will be shown four times. Contrary to public opinion, the language spoken is English, NOT Russian.

The four showings are: Friday, December 4, at 6.15 and 8.30 pm; Saturday, December 5, at 2 and 8.30 pm, in the SPCA. Tickets are now available for .50 in both the SEC office, and the Arts Building, and students are advised to get their tickets as soon as possible to insure seats for the showing they want.

Communist Talks Start Near Riot

More than 400 students forced Alderman Jacob Penner to halt his speech on Communism during a Socialist Youth League meeting at the University of Manitoba which turned into a near-riot on Tuesday.

Penner then turned the platform over to his son Roland, a law student at the University, and a leader of the Communist Party in the current mock parliament elections, who attempted to continue the address on "The Evolution of Society".

Battling the catcalls, Roland Penner told the crowd, "The fight against Communism does not include a resort to force."

The students responded by chanting, "What about Hungary?"

"It is true that restriction of the freedom in Russia has been strict up to 1956", Penner admitted.

A student shouted, "It still is!" "Taking the law into your own hands violates the principles you purport to defend", replied Penner. "What has driven you to this point?"

"You!" screamed the students. The crowd damaged desks in the room. The University administration has closed the room where the incident took place to future meetings of any kind.

nistration has closed the room where the incident took place to future meetings of any kind.

Manitoba Model Council Censures Compromising

WINNIPEG (CUP) — Nov. 25. Compromise is one of the basic diseases confronting the Commonwealth concluded the University of Manitoba's model council at their first meeting last weekend.

The twenty-eight delegates attending felt that it leads to "superficiality", and the refusal to discuss pressing problems for fear of hurting someone's feeling.

To cure these basic diseases the students will recommend to the Governments throughout the Commonwealth the setting up of a permanent consultative council while Universities will be asked to establish model councils.

The council also passed the following resolutions:

- that the proposed Commonwealth council consist of equal delegations from each independent member and of observers from the remaining colonies for the discussion of matters of common concern; that these sessions be held in camera.

- that internal matters having international implication be discussed at the Commonwealth conferences.

- that the Commonwealth move towards further and more effective economic and cultural co-operation for the benefit of member nations.

Willed Queen-Hughes, a leading member of the Winnipeg branch of the Canadian Institute of International Affairs, opened discussion by saying that the genius and perhaps the failure of the Commonwealth lay in its ability, "to find formulae for avoiding things".

Then in complete disagreement with the main conclusion reached by the student delegates, Queen-Hughes said that "Compromise is the solution the Commonwealth puts forwards for all differences. He felt that this habit would lead eventually to the gradual dying out of those differences.

Britain's attitude to the Commonwealth was both chided and commended by the various delegates. Some thought She was too paternalistic acting as though "father knows best" all the time.

Choral Society Warbles For Christmas Concert

This year's edition of the Choral Society's "Sing at Christmas" will be presented in the Sir Arthur Currie Gymnasium on Saturday, December 12 at 8:30 pm. The concert is under the direction of Gifford Mitchell, and will be accompanied by the celebrated pianist, William Stevens.

The first half of the program narrating the Christmas Story will feature carols from the European countries, the Tyrol, the

Appalachian Mountains, and the American South. Also to be included in the first portion is "There shall be a star", from the unfinished oratorio "Christus" by Mendelssohn.

The second part of the program relates the Christmas customs of many lands. The concert will conclude with the cantata, "Twas the night before Christmas" with words by Clement Moore.

Mountain Movie Sponsored By The Outing Club

A movie of skiing and climbing in the mountains of Canada and Alaska entitled "Vagabonds of the Mountains" will be shown at the Physical Sciences Center on Tuesday, December 1 at 8:15 pm. The film is sponsored by the McGill Outing Club.

This movie is filmed and narrated by Hans Gmoser, one of Canada's foremost professional guides. The first part of the 100-minute film shows scenes of the Little Yoho Valley, life in an alpine ski hut, and scenes of skiing in the Selkirk and Lake Louise.

The second section shows an ascent from Mt. Alberta, a study of two young eagles in a nest high above Lake O'Hara, a ski-trek across two glaciers, and a 40 mile trip down the Donjek River via rubber raft, as well as other sequences.

ENGINEER'S INFORMAL

The informal will take place tonight at 9 p.m. in the Currie Gym. Tickets are \$3.00 per couple and will still be available at the dance. The queen of the informal will be chosen from among Pat Falta, Judy Lamb, Mary Harper, Jose Raymond, and Carole Shiller.

Tempus Sure Does Fugit!

WOW! Suddenly it hit us! — today is November 27 — and there are only 19 more days till Christmas vacation — only 19 more days in which to write all those term papers and study for all those tests and do all those problems and copy all those notes from lectures we missed and catch up on all that reading we never read — and suddenly we realized that's why we came to university — not only to work on the "Daily" but to study and to learn and to get an "education" — and so we decided to give up extra-curricular activities for now and stop publishing the "Daily" for a while — we're going to study and learn and get an "education" and we're going to pass this year (we hope) — will you?

The College Press

From Toronto's
THE VARSITY

Vindication

We are glad that the federal government and that of Quebec have resolved their dispute over the thorny question of federal grants to that province's universities.

But we are also glad that the government of Quebec held out for the kind of deal it is now getting.

And we hope that the Ontario legislature goes ahead with the idea of putting grants to its universities on a similarly province-centred basis — an idea in which Premier Frost has already expressed some interest.

Quebec, a province consisting mainly of French-speaking Catholic stock, a minority group in Canada but a minority group which must be guarded if a recognizable Canada is to be maintained, has, of course, a special mission to preserve her autonomy jealously.

But it holds true in almost any corner of the world these days that the individual, the family and many sorts of cultural and religious groups are in grave danger of being ignored in the symmetrical sweeping plans of the Big State — and we refer to the more or less democratic and capitalistic states as well as others.

In fact, we feel that the Big Corporation and the Big Union have their share in furthering this trend.

We doubt if it is exactly what they had in mind, but the authors of the British North America Act gave us an excellent bulwark against this overwhelming bigness in the dominion-provincial-municipal governmental set-up which we have inherited.

Especially in a field which has much to do with moulding individual lives and minds as education, we feel that this bulwark is too valuable to throw away — even in the interests of finding a quick, easy way to give our universities the extra money which they undoubtedly need.

When the late Prime Minister Duplessis of Quebec complained that through the grants the federal government was tending to infringe on the rights of his province, he was, we think, right.

And when he said that the very fact that Ottawa had money to give to the universities showed that Ottawa was stealing money from his province, we still think he was right.

* * *

And we believe that to maintain the cultural integrity of the Canadian educated man, to lessen the influence over our education of those who are not immediately concerned and to preserve our separate cultures which must to some extent remain separate if we are not to lose whatever it is that makes being Canadian valuable, the province should remain the largest unit exercising anything that smells like control over universities as much as the municipality must remain the bulwark of democracy in the primary and secondary schools.

Hindsight

A REAR VIEW

"Actors are a breed apart" said the well-bred Miss Roeberta Beatty, currently directing the Players Club's "Epitaph For George Dillon."

Miss Beatty had arrived for rehearsal, shaking the rain from her head vigorously, her wrist bangles chattering like a subway train. "Brrrr!" said he, continuing in the onomatopoeic vein, "Wish, at least, that it was snow!"

She laughed aloud, a deep throaty laugh that begins far inside, and looked quickly around the room to see if anyone was missing.

She was introduced to a newcomer: "How do you do, darling?" and without waiting for a reply swept back to her coat pocket for a package of American cigarettes. She lit the first of a chain.

A brief discussion in low tones with the producer, throwing back her jacket, putting her hands on her hips, she announced that the first scene was to begin. "And no dialogue mistake!" she said.

Miss Roeberta Beatty had arrived.

Rehearsals actually begun, Miss Beatty paces quietly up and down the room, smoking incessantly, while the actors go through their scene. She stops them occasionally to throw in an idea, an inflexion, or some "business." Then she stands stock-still, waiting to see the effect of her innovation, becoming suddenly intense and annoyed if it doesn't strike her as well as it might; laughing quickly if the idea is successful.

A flash of anger if an actor forgets his lines; a stubborn fit of temperament if someone is late; a smile of pleasure if a scene is carried well. Miss Beatty acts the directress — wholly intent upon the emerging play and yet never unconscious of her own movement and appearance.

Always immaculately dressed, and forever wearing a cloche hat that descends over her forehead and trespasses on the nasal regions, Miss Beatty gives the impression of severe actorial discipline. She has nothing of the "arty" about her overall appearance, but only in her voice and in her manner.

A temporary break in rehearsals brought her to our table.

"Actors are a breed apart" she said (and this is where we came in). "I don't think I've ever met a

by ALLAN SHIACH
with CHRIS BRYANT

single actor of merit who has had a placid personality. You see there's a compulsion to acting; a raison d'être, and actors are always driving, energetic, vital people." She instanced Christopher Plummer, a personal friend of hers (as, indeed, is practically every known figure on the Broadway stage). "Now I think Chris can be one of the finest actors in the world today. He is certainly the most versatile, entertaining and serious actor in New York." And his personality, says Miss Beatty, is just that: intense and exciting.

ACTING TALENT

"How can you tell," we asked "if an actor is going to be any good?"

"I can tell in two minutes if an actor has any talent," she replied. "The spark is there!" A flourish with her bangles and a newly lit cigarette: "The spark is there, and it waits to be discovered. People have often come up to me and asked: should I go into theatre? I always say — her voice drops to a basso profundo — "I always say: do you have to? If their answer is no — then they shouldn't!" It all ties in with actors being a breed apart.

"Why" we enquired "does one become an actor?" (Which is a pretty Victorian question... but we live in Canada.)

"An actor becomes an actor because he has to. It is a compulsion." Actors are, after all, a breed apart.

"And what about this artificiality that they carry into their private — and hence other people's — lives? The theatricality of their social existence: is this wholly permissible?"

Miss Beatty smiled quickly: "Certainly, darling!" Actors are a breed apart.

"Epitaph For George Dillon" we remarked, "is not reputed to be the best of Osborne's plays. What is your own opinion of it?"

"Well, I prefer this play to any of his other ones. It has a dramatic effectiveness, a strength of characterization and dialogue that is far

and away higher than Look Back In Anger or The Entertainer". However when George Dillon opened in London it was received coldly by the Press (i.e. journalists, not the Masses) as an immature and less worthy work than Look Back In Anger. Miss Beatty disagrees with these views: "In George" she says "Osborne has said everything that he said in Look Back In Anger, but with more dramatic impact, and with a better dramatically constructed play." The climax, to George Dillon, is reputed to be a brilliant theatrical experience.

Roeberta Beatty (and the producer insisted that we spell the Christian name with an "e") began her theatrical life in musical comedy. "I was precipitated into it!" It was only later in her life that she turned to the dramatic theatre where she played in numerous Broadway successes — and her legitimate share of non-successes. "Can you name some?" "Oh God no! I've played in so many shows in my life I couldn't possibly name any specifically," she replied.

However, she did, when pressed. She was the original princess in "The Student Prince" during its opening Broadway run and, says she, it was her greatest moment in theatre.

"The play and the entire cast were such a success on opening night that the audience stayed in the auditorium for 25 minutes after the final curtain applauding and crying 'Bravo!'" she recalls.

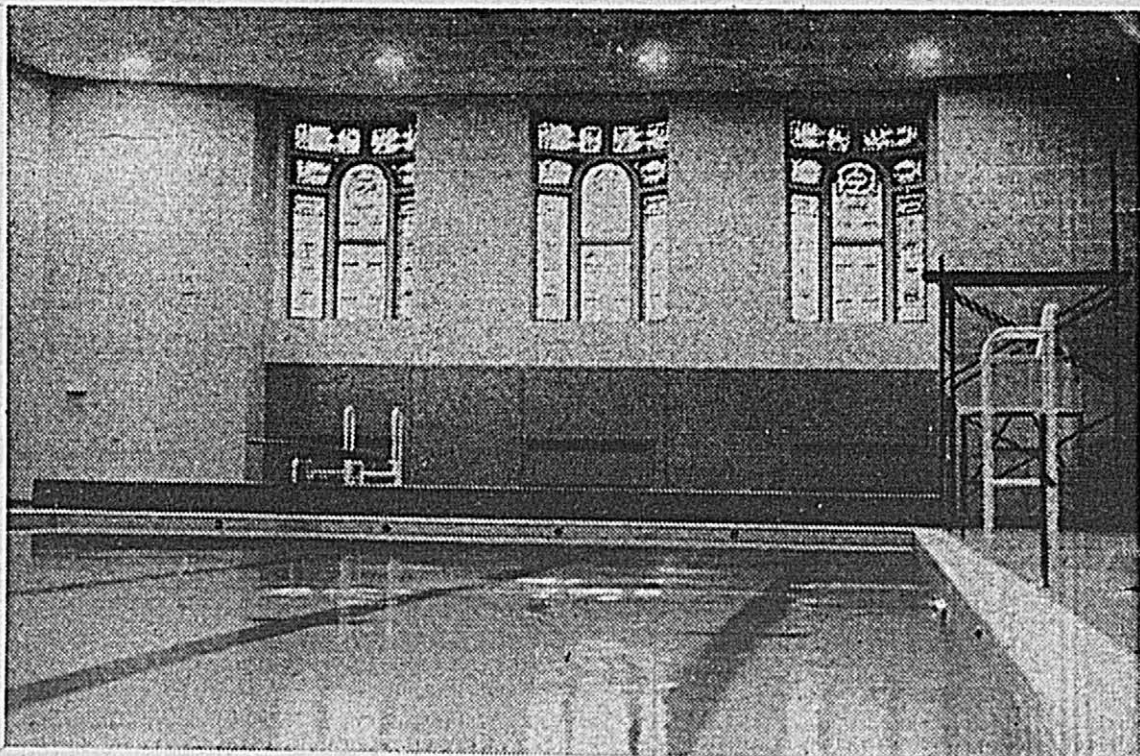

And during her lengthy career on the stage she has met and known most of the greatest theatrical personalities. She talks (languidly, and in a deep contralto voice) of Chris (Plummer), Elia (Kazan), Kim (Stanley), Leslie (Howard), Johnny (Van Druten), Helen (Hayes) and a host of others.

"Who" we asked "would you rank as the three greatest actors in the world today?"

She wouldn't commit herself, but allowed that Sir Laurence Olivier and Sir John Gielgud probably rated. A female great? "No... none." We suggested Helen Hayes, but Miss Beatty didn't agree. "But Kim Stanley — yes, there's a great actress. Did you see her in Tough Of The Poet? A brilliant performance."

"What about Leslie Howard?" (With whom she worked on Aren't We All?)

NEW SWIMMING POOL in ROY

Inviting spectacle of the new Royal Victoria College swimming pool, open for recreational swimming Monday.

— Ed Stahlberg

Electronic Music at Moyse Hall Monday

by GRAEME BELL

McGill students will have the opportunity to hear a most striking and unusual concert, when one of the first public performances of electronic music in Canada will be given in Moyse Hall on Monday, November 30 at 8:45 p.m.

Four composers are contributing works to the programme: Dr. Hugh LeCaine and Dr. John Bowsher, both electronic engineers at the National Research Council in Ottawa, Karlheinz Stockhausen of Cologne, Germany, and Istvan Anhardt, Professor of Composition at the McGill Conservatorium of Music.

Dr. LeCaine is one of the greatest authorities on electronic music in the world and has pioneered the study of this trend in musical development in this country. Karlheinz Stockhausen is undoubtedly the most important exponent and composer of electronic music today and has sent a tape-recording of his works from Germany for this concert. This summer Professor Anhardt was invited to spend two months in Ottawa at the National Research Council's laboratories in order to compose the work which will be heard on Monday.

NEW DEVELOPMENT

Electronic music is still a comparatively recent development in musical thought, since it has only come into prominence within the past ten years. Now, however, it is recognized in Europe as a new art form and is hailed as the greatest development in music to appear in the last 25 years.

To appreciate the new sounds which form the basis of electronic music, the listener must divorce himself completely from the traditional noises which, at present, he recognizes and accepts as music. Electronic music is an innovation, and, as such, requires adult understanding and thoughtful analysis on the part of the listener.

COMPARISON USELESS

Comparison with traditional music is valueless, since it is in the inherent nature of art to change its form and reappear in the idiom of a changed society. And in a society in which science plays

such a vital role, is it not natural that the modern thought should find expression in music? It is for us, as members of such a society to make the effort to understand and appreciate its artistic manifestations.

Music produced by electronic means is, after all, nothing unusual. Gramophone records and electric guitars are both examples of sounds reproduced electronically, but in these cases the aim is only to reproduce, or at most modify existing music.

In that type of music which we specifically term "electronic music", however, electronics are taken much further. Here the actual sounds which go to make up the music are engineered in a laboratory, recorded on tape and finally built up by the composer to form the finished work.

The works in Monday's programme have been chosen to represent the two main schools in electronic music today.

'MUSIQUE CONCRETE'

The first trend, known as "Musique Concrete", originated in Paris in the early 1950's. Here, sounds caused by natural objects or persons, for instance the noise of breaking glass, or a drop of water falling, are recorded on tape and treated electronically. That is to say that the tape with the sound of the drop of water falling is run through at higher and lower speeds than normal. The increase or decrease in speed cause the sound frequencies to change and higher or lower tones are produced. (The same result as is obtained by playing a 45 rpm record at 78 rpm.)

Then, if the three sounds produced in this way are played together, a three part harmony is formed. This is a simple example of the synthetic nature of this genre.

The second trend is that of electronic music proper, where the original sounds themselves are created by electronic devices. Here, perhaps more than anywhere else, preconceived ideas of

the nature of music must be set aside.

TONAL DIFFERENCES

We are able to distinguish the difference in tone between the same note played on the piano and the clarinet because the audio-frequencies of the notes are the same, though the mechanical actions required to obtain them are different. The note on the piano is the result of a felt pad striking three wires: on the clarinet it is formed by sufficient air through a reed to make it vibrate. These are known as "complex tones".

Electronic music, however, uses as primary tone material what are called "sine" tones. These are the simplest tones which can be achieved, since the instantaneous transformation of electronic frequencies into sound requires none of the mechanical action employed in traditional music.

The composition is worked out by the same process of synthetization as "Musique Concrete", but is distinguished in that it possesses a property unknown in traditional music. This is "White Noise".

'WHITE NOISE'

In the same way that the colour "white" is composed of all possible colours, so "White Noise" embraces all audible sound-frequencies.

Professor Anhardt described this phenomena as the impression made on the senses by the sound of a wind blowing through trees by the sea. Each leaf and branch is making a sound of a different pitch and the sea in the background provides the lower register notes. The overall effect is similar to that caused by "White Noise."

This has been an attempt to explain some of the broad outlines of electronic music. More detailed information can be obtained during the "Question-Answer" period which will follow Monday's concert.

With Malus Aforethought
catharsis: ("pocket size")

by MIKE MALUS

THE METAPHYSICIAN

With studied anguish: ("His soul had died.")
The self-styled "Existentialist" sighed:
"What if our 'Earth'
is just the 'Hell'
of some other earth?"

He paused in dejection
and continued in abstraction:

"Look at it this way:
If you set out
in grim humour
as He did
to make a Hell
what the hell
could be better
than the earth?..."

TRANSFIGURATION

The critics have a phrase
belittling clairvoyance.
They call it: "Garbage can realism"
It usually goes hand in hand
with "Brutal" or "Sordid".

But why pick on garbage cans?
all right, let's look down an alley
one of those filthy medieval lanes
anywhere downtown.

But give it a minute
and watch:
A littered flock of old papers
like whitecaps lurching
in windy waves
around a pair of comically concave
trash cans
transform the mangy, foraging pigeons
into seagulls...

STUDY IN MASCULINITY

He gave her about three good shoves
she shrugged them off casually
with bovine grimaces.

It was a simple scene:
a man beating his wife
in broad daylight
right on the sidewalk.

The sickening thing was
she only complained because
"There's people watching."
(Apparently it's all right in their apartment)

So he bellowed:
"I don't give a ———
who's watching."
And landed a solid right...

ROYAL VICTORIA OPENED TODAY

by ANN WILSON
Features Editor

The long-awaited women's swimming pool in Royal Victoria College becomes reality today with the official opening by Dr. F. Cyril James, Principal and Vice-Chancellor.

Highlight of the ceremony will be the unveiling of the Strathcona Windows, stained glass representing the men associated with the founding and development of early Canada given to the College by an anonymous donor. The three windows, "Montreal", "Quebec" and "Rupert's Land", have been taken from the dining room of Lord Strathcona's old house on Dorchester Street.

The new pool and associated facilities are modern, light-flooded and beautiful. One's first impression on entering is of light pouring through the stained glass windows, casting shimmering reflections in the still green water. Two entire walls are a sunny yellow, while French beige, white and blue combinations make up the remaining wall area.

The pool itself is 75' x 35' standard length, with five lanes. It will provide recreational swimming for all women students, alumnae and women staff members. In addition, all required physical education classes in swimming and diving will be transferred from the Sir Arthur Currie pool to RVC.

PHYSIO CLASSES

Special provision has been made for classes in Physical and Occupational Therapy, and a large cupboard has been reserved for therapeutic equipment.

However, competitive swimming and the W.A.A. Water Show will be continued at the Currie pool, due to the large space in the bleachers there for spectators.

Included in the new wing are offices for the swimming director, the Women's Athletic Association

and pool attendants, locker and shower rooms and the engineers' room (not to be confused with the Iron Ring room in the Plumbers' Palace). All offices are bright and cheerful, with built-in cupboards and shelves. While we were being shown around, work was still proceeding on the installation of furniture, painting and cleaning. It appears much last-minute rushing is necessary so that the opening will be a success.

Seven hairdryers and large mirrors will greatly facilitate the efforts of women using the pool in quickly losing the bedraggled look so common amongst that sex when emerging from the water. Present women's facilities at the Currie pool include only four hairdryers.

EXCAVATION

Actual excavation of the pool began last October, but much preliminary work occurred before this date. Architect Galt Durnford, contractors J. S. Hewson and Son and engineer Thomas Anglin are chiefly concerned with the construction.

At the opening today, members of the Board of Governors and their wives, women professors, all fourth year women students, executive members of the Women's Union, Women's Athletic Association and Royal Victoria College, and Red Wings will be present.

The pool opens for recreational swimming Monday, Nov. 30. Hours are 4 to 10 pm until Dec. 16, after which they will be increased. Women students using the pool must present their student card, which will give them use of a locker and towel and bathing suit drying service. Students may invite guests (girls over 16 years of age) to use the pool at a charge of 50 cents. (Entrance is through the main front door of RVC — go down stairs to basement, turn right.)

Last one in is a sissy!

PLACEMENT SERVICE PLANS BIG BLITZ

by ROSEMARY CALLAGHAN and ANN WILSON

The big blitz, the fast and furious campaign to find positions for graduating engineers and scientists, gets underway on January 4, and lasts till January 6. To date, it has attracted 113 companies, a considerable increase over the eighty-five which took part last year.

Holding as many interviews as possible during a short period of time is a relatively new idea. It has proved very

beneficial to the students, however, since the interviews are held at a time when there are no lectures in progress. The students are more relaxed when they don't have to watch the clock and more students have a chance to be interviewed.

Appointments for interviews can be made between December 7 and 15. The average person is interviewed by seven companies and the Placement Service feels that eight interviews are ample. A set time of twenty-five minutes per student is allotted in order to give every-

one a fair chance. Information from the various companies is available in the Iron Ring room where the appointments are to be made.

Every available room in the Chemistry Building, both Engineering Buildings and the Physical Sciences Centre will be utilised during the blitz and judging from the numbers which took part last year, all of them will be filled. Sixty-nine per cent of the graduating students in Engineering and Science took part last year and two classes, Mining and Metal-

lurgical Engineering, participated fully in the program.

The Placement Service does not operate only for the benefit of Engineers and Scientists. Arts students and Commerce men are interviewed all through the year, although they do not participate in the January rush. Engineers seem to be the most fond of interviews with a total of 271 making 1608 appointments last year.

The fact that the number of companies participating is greater this year than ever before indicates that there may very well be more positions available.

The idea of a concentrated campaign is as much to the advantage of the employer as it is to the employee. The company has a chance to settle positions earlier in the year, and less time is wasted over late appointments.

All students do not participate since many summer jobs turn into permanent positions upon graduation.

One further advantage must be taken into consideration. Girls take note. During the blitz it is always possible to distinguish a fifth year engineer or a graduating scientist. They actually wear ties.

The National Employment Service also adds to the opportunities available for student placement. For the first time the NES will extend its services to graduates. In the past they have been available only to undergraduates seeking part-time employment. In agreement with the university authorities, they have been available only trained and experienced personnel to the work.

At McGill where we already have a Placement Service the NES works in conjunction with

it. With all the services available for graduating students and undergraduates also, it is felt that a larger number than ever before will make use of these facilities, especially during the blitz.

What the Women Think of the Women's Union

BA 3 non-resident :

1. To unite the female student body.
2. They should amalgamate with the present Students' Union.
3. I would give a dollar if I knew they were going to do something concrete with it.

BSc 2 resident :

1. To foster activities of women students.
2. No, I don't think there should be a separate women's union.
3. No, I wouldn't.

BSc (N) 1 non-resident :

1. I don't know the purpose of the Women's Union.
2. No, it should not be separate.
3. No, I would not pay a dollar.

POT 1 non-resident :

1. To arrange activities and mix non-resident and resident students.

2. Yes, it should be a separate organization.
3. Yes, I would vote to raise the fees because I won't be here next year.

BA 1 resident :

1. I don't know what purpose it serves.
2. Since I can't answer the above question, I don't know whether it should exist as a separate unit.
3. I would pay an extra dollar to support it.

BSc 1 non-resident :

1. The purpose of the Women's Union is to regulate all women's activities.

3. I would not contribute financially to an independent Women's Union.

POT 2 non-resident :

1. It is a union of women.
2. It shouldn't be independent.
3. I oppose any raise in the fees.

BSc 3 non-resident :

1. I don't know what it is, I don't think it should be independent, and I wouldn't pay to make it independent.

BA3 non-resident :

1. It should unite women students.
2. It should join the Students' Union under a revised constitution.
3. I would not pay an extra dollar.

BA 3 resident :

1. I don't know what it is; if I did, I'd think it shouldn't be independent, and I wouldn't want my fees raised.

"EXPORT"

PLAIN OR FILTER TIP
CIGARETTES

Following the Students' Society meeting discussion on the Women's Union, the Newsfeatures department of the Daily decided to conduct a poll on the subject. The following questions were asked:

- 1) What is the purpose of the Women's Union?
- 2) Do you think the Women's Union should exist as a separate entity?
- 3) Would you voluntarily raise your fees \$1 to support a separate Women's Union?

Eleanor Webster, President of the Women's Union stated last night that the purpose behind the women's Union was as follows:

- a) To promote the social and cultural interests of women students;
- b) To act as a service organization for the students and the university;
- c) To act as liaison between resident and non-resident students and to encourage activities with and between these groups.

The statements printed on this page are representative of those given to the members of the staff taking the poll.

2. Yes, it should be separate.

3. Yes, I would pay a dollar.

Grad. Nurses' 1 non-resident :

1. It is an association which promotes both social and educational activities.

2. It definitely should remain the same as it is now.

3. I would gladly contribute a dollar.

BA 2 non-resident :

1. It is a bureaucratic organization formed to boost the egos of a small number of female students.

2. I don't think it should exist at all.

3. I would not pay anything to support it.

BA 2 resident :

1. It establishes a connection between women students and promotes activities on campus.

2. I am in favor of keeping the "status quo".

3. I would contribute a dollar a year to support it.

BSc (N) 1 :

1. I don't know what it is.
2. I don't think it should be a separate unit.

3. I would not support it.

BSc 3 resident :

1. It unites women students at McGill.

2. It does not function properly as a separate unit.

3. I would not support it.

BA 2 non-resident :

1. It promotes activities to unite residents and non-residents.

2. It should remain independent.

3. I am undecided about the amount of financial support I would be willing to give.

BSc 1 non-resident :

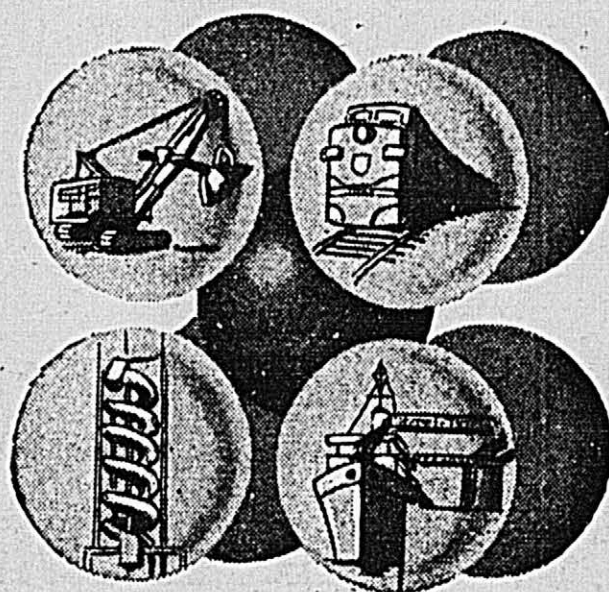

1. The purpose is to promote closer ties between residents and non-residents.

2. I don't think it should remain as it is.

PERCENTAGE RESULTS

Do you think the Women's Union should exist as a separate entity? YES : 41.6% NO : 58.4%
Would you voluntarily raise your fees \$1 to support a separate Women's Union? YES : 29.2% NO : 54.2% UNDECIDED : 16.7%

What is the purpose of the Women's Union? 97.4% of the answers received were incorrect. One person answered correctly.

IN IRON ORE... A FUTURE

Well established and stable, the Iron Ore Company of Canada and its Associates are at the same time pressing forward a vigorous development programme of significance to the country. By participating in this growth, a young engineer may hope to use his imagination and resourcefulness while finding the professional satisfaction that is possible in a mature operation.

Operations of the Iron Ore Company of Canada and its Associates include: the open pit mines at Shefferville, Que. (Knob Lake); the complete railroad system of the Quebec North Shore and Labrador Railway; and the terminal shipping facilities at Sept-Iles, Que., where ore may be moved onto vessels at the rate of 100,000 tons every 24 hours. Among the newest developments of the group is an important mining and beneficiating undertaking, Carol Project, north of Sept-Iles, destined to process 6 million tons of ore a year.

Geologists or engineers — mechanical, electrical, metallurgical, civil and mining — are invited to visit the representatives of the Iron Ore Company of Canada and its Associates when they come to your campus on 4, 5, 6 January.

IRON ORE COMPANY OF CANADA QUEBEC NORTH SHORE & LABRADOR RAILWAY

Further information may be obtained from: Personnel Department, Iron Ore Company of Canada, Sept-Iles, Quebec, or your Placement Officer on the campus.

DAILY SPORTS

Heavy Slate On Tap For Redmen Cagers

While the Daily dozes and the staffers study, the Redmen Basketball team will see action in five contests. To date, the McGill cagecrew has a 1-1 won-lost record. They clobbered the Loyola Warriors and were beaten by the Georgians.

Three of the upcoming games will be played within five days. On Tuesday, December 1, the Redmen tangle with the University of Montreal Carabins at the Currie Gym. They visit a crew from Plattsburg the next day in an exhibition contest, and entertain the same team on Athletics Night, Saturday, December 5.

The Redmen will try to make it two straight over the Loyola Warriors in the Montreal Basketball League when they meet at

the Currie Gym on December 8. Their last game before the holidays is an exhibition on Saturday, December 12 against New Bedford at the Currie Gym.

In January, the Red and White cagers will resume action in the MBL and open the OQAA Intercollegiate season.

McGill, Blues Up For Polo Trophy

"The boys are probably in better shape this year than this time last year", disclosed Ross Firth, coach of the McGill Senior Water Polo Team, and considering that the Red and White won the championship last year for the fourth time in a row, the outlook certainly is good. Tonight at 8 pm, in the Currie pool, the boys go at it for an unprecedented fifth straight against the University of Toronto in the first game of a home series for the Hershorn Trophy.

Among those scheduled to see action are Ery Magasanik, whipper veteran of intercollegiate action, and goalie Juris "Swiss" Swistunenko. Swimming ace Cameron Grout, holder of several records and a member of the Canadian British Empire Games Team, will head the power lineup of Eddy Menashe, Leon Taylor, Dave Sherwood, and Henri "Rocket" Polki, while keeping the enemy's scoring guns quiet will be defensemen Morty Belinsky, and Andy Halmay.

As in previous years, the winner will be determined by the total number of goals attained during the two game series. In last year's contest, the Red and

White were edged out by the score of 7-6 in the first of the back in the second with a nerve-two-game series, but they rushed tingling exhibition of skill to tally eight more times and take the championship by a 15-14 edge over the Toronto team.

The second game of the present series is slated to be played next Saturday in Toronto.

SWIMMING

Commencing the week of the seventh of December Recreation Swimming will be held Monday, Tuesday, Thursday, Friday and Saturday until Christmas holidays.

Women's Sports

Schedule

FRIDAY, NOVEMBER 27

EXERCISES: Conditioning exercises for skiers 1:30-1:50 pm in the RVC gym.

BADMINTON: The last meeting of the Badminton Club will be held next Tuesday, December 1. Regular meetings of the Club will resume after Christmas.

C—Monday, November 30th. Loyola at McGill, 6 p.m.

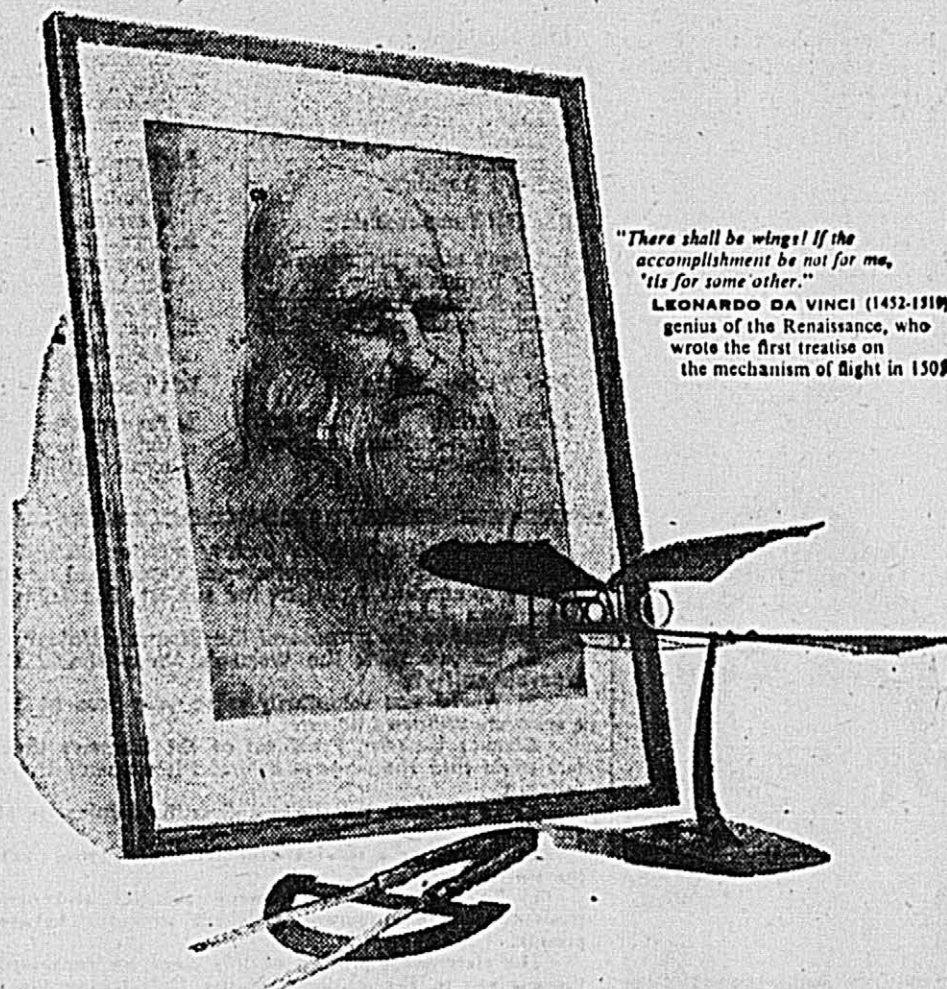

C—Wednesday, December 2nd. U of M at McGill, 6 p.m.

I—Friday, December 4th. Queen's at McGill, 8 p.m.

C—Monday, December 7th. Sir Geo. Wms. at McGill, 6 p.m.

I—Friday, December 11th. McGill at Laval, 8 p.m.

I—Intercollegiate
C—City Round Robin

"There shall be wings! If the accomplishment be not for me, 'tis for some other."
LEONARDO DA VINCI (1452-1519)
genius of the Renaissance, who wrote the first treatise on the mechanism of flight in 1508.

And the "wings" came for Canada on February 23, 1909, when J. A. D. McCurdy flew the "Silver Dart" for Alexander Graham Bell's Aerial Experiment Association and its five original members. Its first flight was for half a mile at 40 miles an hour at Baddeck, N.S.

Canada's airmen gained distinction in two World Wars; and her airlines rank fourth among all nations in passenger-miles flown annually.

The future of aviation in Canada is as limitless as the potential of our young and vigorous nation. In so many realms of national activity—transportation, exploration, defence—Canada will use the air with ever increasing effectiveness.

Our interviewers will be on campus January 4, 5 and 6, 1960.

Hockey Outlook Bright-Play Mon.

by HENRY MINTZBERG
Sports Editor

The McGill Winter Stadium is swelling with optimism of late, and with good reason. The 1959-60 edition of the McGill Redmen Hockey Team is the keenest group of athletes that this school has seen in a long time. With 11 veterans as the nucleus and a coach in the person of Ken Murray, who has had one important year of intercollegiate experience, top-notch, exciting hockey is expected.

The important improvement is in the attitude of the players. They are working strongly together, with the veterans doing much to get 7 rookies into shape.

The team is in good condition this year. Alex Herron, the boy who impressed a lot of people with some outstanding goaltending, will be back in the nets this year. In front of him will be an improved defensive unit headed by Leo Konyk, Mike Richards, and Paul McDonald. Konyk returns after a year's absence and is expected to be an important factor in an improved team. He was a Collegiate all-star forward in 1957-58, but will be used as a defenceman to strengthen the rearguard unit. Richards was chosen as the most improved Redmen last year, while McDonald comes up from the Inters.

— Charles Kinghorn

Back for what should be another sparkling year is goalie Alex Herron. Alex is the top netman seen around these parts in a long time, and with a vastly improved defence in front of him, he should be on the right end of low scores this season.

Up front, the lines of Steve Molson, Joe Irwin and John McLernon, the latter two of football fame, and Tim Peters, Bruce Hutchison, and Gord Merritt will add the necessary scoring punch. McLernon comes to the Redmen by way of the Inters, while Merritt also returns after one year's leave of absence. Irwin was a top Redmen forward last season, while Molson, Peters and Hutchison were rookies last year. These three boys improved greatly last year and should add much strength as veterans. John Gilfillan, Dave Flam and Steve Moseley will team up to form the team's checking line.

Greatest loss to the Redmen will be Terry Dingle. His strong defensive play will not be seen this year, as he has decided to sit 1959-60 out. Jim Grant will not be playing while Dave Laroche and Terry O'Connor have graduated. Defenceman Doug Maule has also made up his mind against playing for the Red and White.

Coach Murray feels that he is in a much better position this year. His toughening up as a coach will be a key factor in the team's improvement. He feels that the boys have a lot more hustle than last year. "They are skating harder and the kids are very keen."

Only one injury has occurred to date. John McDonald, a defenceman up from the Inters, broke his shoulder in practice and is out for the season. Pete Lindsay switched from the Redmen to N.D.G. and in his first game suffered an extremely serious injury.

The Redmen will have a lot of time to test their new confidence

— Charles Kinghorn

A GOOD PART of the Redmen's scoring punch will come from the line of Tim Peters, Bruce Hutchison and Gord Merritt (left to right). Peters and Hutchison were rookies last year, and developed remarkably during the season. Merritt sat out '58-59, but should be useful in the Redmen camp this semester.

Saturday, December 5

Watershow, Hoopla, Grappling

Highlight Athletics Night 1

Each year a joint committee of men and women organize an Athletics Night — an evening designed to provide spectators with a cross-sectional view of the numerous and varied indoor sports at McGill. It also serves as an opportunity for University athletes to gain experience in top grain competition.

Athletics Night I will be staged in the Sir Arthur Currie Memorial gym Saturday, December 5. Highlighting the panorama of sports will be intercollegiate competition. Two college teams, imported from the U.S. for this evening, will match their skills against McGill's basketball and wrestling teams. Sharing the limelight with these two major sports in the Women's Water Show.

HOOPSTERS MEET TEACHERS

The Redmen basketball squad is pitted against Plattsburg Teachers College, a highly rated team from below the border. The game will prove to be a real thriller as the McGill cagers handily downed by the Yanks in last year's tilt, are seeking revenge. To date the Reds have registered a 1-1 record on the score sheets. They started off the season with a sound trouncing of Loyola but bowed out to the Sir George William's Georgians by virtue of three points.

WATER SHOW

The Women's Athletic Association is sponsoring the Water Show, slated to run two evenings, Friday and Saturday in the Currie pool. Swimmers from both McGill University and Macdonald College will contribute to the success of the show. As an added sidelight, the men's Water Polo Team will participate in the production. This is an innovation to the show.

Each year the show develops around a theme and the swimming routines are planned according to it. The plot this year is "ART HAS MANY FACES".

Ski Expert Visits Women Ski Club

There will be a meeting of the Women's Skiing Club with speaker Real Charette next Tuesday, December 1, at 6 pm. in the Common Room at RVC.

Mr. Charette is the head of the ski school at Grey Rocks Inn. Two years ago he was head of the Ski Instructors School in the Laurentians. He specializes in working with young racers.

Mr. Charette will give a talk on the fundamentals of skiing and equipment. An excellent movie on Lucille Wheeler and other "ski pros" such as Colin Grace will be shown.

Refreshments will be served and all women students interested in skiing are welcome to attend.

Coming

(continued from page 4)

NEWMAN

Friday, November 27, 12.15 pm — There will be informal noon-hour talks with Father Hilton.

Friday, November 27, 8.30 pm — The Millionaire's Night Dance will be held. Everyone is invited.

Monday, November 30, 1 pm — Paul Noble will lead a discussion group.

Monday, November 30, 8 pm — Father D. Asselin, S.J., will speak on the "Mystical Body".

Tuesday, December 1, 7.30 pm — The Leadership study group will meet tonight and every Tuesday.

Wednesday, December 2, 8 pm — There will be a study group every Wednesday. Father Breen will discuss Theology, and Father Hilton will speak on Psychology.

Friday, December 4, 6 pm — First Friday of the month will be celebrated by a Communion Supper after Mass.

Monday, December 7, 8 pm — Father D. Asselin, S.J., will give a lecture on "The Layman in the Church".

Friday - Sunday, December 4-6 — Newman Federation (CFNC) will have a convention this weekend in Kingston.

Friday, December 11, 8.30 pm — Pre-Christmas Dance.

It revolves around an artist as he searches through the ages for inspiration. In his quest he learns to combine the simplicity of the rainbow with the excitement of impressionism.

As the knowledge he obtains emerges into colours, shapes, and textures on the artist's easel, so the visions are brought to life in the water.

Admission to the show is \$1.00 and tickets for the Friday night performance may be obtained at the Phys. Ed. office in R.V.C. or at the Student's Union. There is no advance sale of tickets for the Saturday night performance.

WRESTLING AND SQUASH

The other American team — from Paul Smith's College —

will provide peak competition for McGill's grapplers. The mat sport will be featured in the BWF room.

The University's top Squash players are expected to receive tough competition as they meet a Montreal crew of peak calibre. The Jester team composed of some representatives to the North American championships will be on hand to display the skills of a winning team.

DANCE IN THE GYM

To round off the evening (on a less energetic note) there will be dancing in the gym from 10-12 to the tune of Mike Dodman. Tickets for Athletics Night will be sold at \$1.00 per person in the gym.

Remaining Schedule of all Intramural Leagues for first Term
